NSB[®]

premium

La marca **NSB**, especializada en rodamientos automotrices, ofrece una amplia gama de variedad en la búsqueda de refacciones para el buen funcionamiento de su vehículo.

- Fabricados bajo especificaciones de equipo original para soportar el desgaste y la corrosión
- Mayor durabilidad gracias a su acabado térmico
- Duración de más de 60 mil kilómetros y con la cantidad de grasa necesaria para su mejor desarrollo

Las mazas forman parte del sistema de rodamientos de un automóvil, se encargan de resguardar la fricción del eje, permitiendo que las llantas giren libremente y se pueda tener total seguridad al conducir.

- Controlan la posición y reducen la resistencia al rodaje entre las ruedas y el pavimento.
- Resiste los impactos causados por los baches.
- Soporta el calentamiento de las llantas a altas velocidades.
